

TECHNICAL SERVICE BULLETIN

MODELS: MAXJAX M6 AND M6K

SUBJECT: SAFETY WELDMENT REPLACEMENT

The purpose of this Technical Service Bulletin is to describe the replacement Safety Weldment procedure that is required with your newly purchased MaxJax.

Overview

The Safety Locks provide a positive mechanical stop once your Lift is raised to a desired height. Due to the chance of a component interference that may cause limited Safety Lock movement, the Safety Weldments on your new Lift are being replaced by the two new Original Equipment Parts (OEM) parts found in this package.

The Safety Weldment looks like this:

What you need to do

Follow the installation process listed in the Manual using only the Original Equipment Parts (OEM) parts found in this package.

You can discard the Safety Weldments that are in the Parts Box that came with your Lift.

If you have any issues with your MaxJax Portable Lift, visit maxjax.com/support, email support@maxjax.com, or call **(844) 629-5291**.
